

Lily and Milo are going to feed ducks in the park.
Before they go outside, they put on their coats.
There are two coats: a purple coat with flowers
and a little orange coat.
Which coat is Lily's?
And which one is Milo's?

Lily puts on the purple coat with flowers.
The little orange coat belongs to Milo.
Now they have to put on their boots.
There are red boots, boots with a fur brim,
little blue boots, and boots with flowers.
Which boots are Lily's?
And which ones are Milo's?
