The background of the page is a deep blue with several microscopic organisms. In the top left, there's a large, fuzzy, light blue structure. In the top right, a long, thin, light blue rod-shaped bacterium is visible. On the right side, a vertical structure covered in fine, hair-like filaments (possibly a fungus or a specific type of bacterium) extends from the top to the bottom. In the bottom left, there are some blurry, light blue shapes. The overall effect is a scientific, microscopic theme.

Index

Making penicillin **16 — 17**

More antibiotics **18 — 19**

Antibiotics at work **20 — 21**

Resistance **22 — 23**

Glossary **24**

Germs!

Germs are tiny, tiny creatures that sneak into our bodies. When they get inside, they make us ill.

Germs are so small we can see them only with a **microscope**. >>
