HOW TO DRAW EVERYTHING

Hello! Today, I'm going to teach you how to draw 500 pictures step by step, just like a real artist. Don't worry: it's easy and lots of fun if you follow each step carefully.

1. Choose your drawing: First, find a picture you like. It could be an octopus, Santa Claus, or even a zombie. Explore each section of your book and you're sure to find something you'll love!

2. Look at each step: Each drawing is broken down into small, easy-to-follow steps. Start with the step on the far left. Look carefully at the shape you need to draw, such as a circle or a line.

3. Draw Step by step: Take a sharp pencil and copy the first step onto a sketchbook or a sheet of paper. Don't press too hard, so you can erase it easily if you make a mistake. Don't try to draw everything at once. For example, if the first step is a circle, draw only that circle.

4. Move on to the next step: Once you've finished the first step, look at the next one. Keep going like this, adding each new part until your drawing is complete.

5. Make your drawing even better: When you've finished all the steps, take a look at your drawing. Does it look like the original picture? If it does, great job! You can also add your own details and color your drawing to make it even more unique. (***You'll find all the drawings in color on page 116.***)

6. Practice regularly: The more you practice, the better you'll get at drawing. Try again with other pictures, and before long, you'll become a real artist!

And that's it! With a little patience and practice, you'll be able to draw anything you want by following the steps.

Have fun drawing!
