# AUTHOR'S NOTE

**This colouring book  
is an invitation to slow down,  
imagine and create.**

Welcome to my fantasy world! In *Tiny Fantasy Houses*, I invite you on a journey filled with magical little houses, big and small, each with its own story to tell and unique tiny inhabitants have found a place here too.

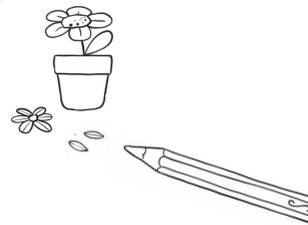

I hope the 40 cosy colouring pages bring you as much happiness as they brought me while creating them. All the fantasy houses started with everyday objects, playful themes and small sparks of inspiration. From music and travel to circus and even TV & radio, each theme opened the door to a new fantasy house. Once an idea appeared, my imagination couldn't stop. What kind of windows would fit? Who might live there? And what little details would turn it into a place full of character?

Whether you're young or young at heart, just starting out or already experienced, pick up your markers, pencils or pens and let your imagination guide you. At the end of the book, you'll find a page with some special fantasy houses where you can save your favourite colour combinations.

**Welcome to *Tiny Fantasy Houses* and  
most of all: happy colouring!**

With love,

**CARLA KAMPHUIS**
