

Beyond the Sky – The great space clean-up

This book will take you on a journey 180 million kilometres from planet Earth. You will meet Qi and Ra, two friends who live on a tiny asteroid and are forced to deal with space junk.

Disused satellites, empty rocket-fuel tanks, tools such as hammers, screwdrivers ... even shoes, towels and empty food packaging ... All human-made objects which for centuries will remain in space and will trash Qi and Ra's world.

Will you help Qi and Ra to rescue their beloved world?

A picture book with many illustrations, which presents the urgent subject of space pollution in a light and colorful way. For 5-year-olds and above, and of course grown-ups. Written in English.
