An Unexpected and Unnerving Experience .....83  
The Church Unprepared to face New Realities  
The Law of the Land  
Closing Thoughts  
Benediction

Note: References made from God's Word have been taken from the NIV

## ACKNOWLEDGEMENTS

### **Personal**

Much thankfulness to my loving wife Louisa who has given me again much needed time and encouragement to work on this difficult project. As I went over this particular issue of homosexuality in the context of the church it also helped her to get a better understanding of what was at stake concerning possible splits in the many church communities and denominations.

Again my thanks to Richard Anderson who edited also the manuscript of this shorter book.

During his professional life he was responsible for translation accuracy of valve maintenance procedures on high pressure pipe lines involving English to Spanish and Russian. He also helped a Mexican Indian Language Group translate the New Testament and publish a 900-page bilingual dictionary in their native language and Spanish. In his comment on the book he entrusted me with the following thought that “It was easy to read and should stir up a lot of interest.”

It is hoped that there will be lots of interest in the contents of the book. Not only that, but also that many will seriously reflect on its contents and come to accept the biblical position on immorality in general and homosexuality specifically. God always inspires people, throughout history, to see the truth, accept the truth, hold on to the truth and live according to the truth. He also understood that people, including covenant people, were able and willing to circumvent the truth. All of biblical history till our days, is a testimony to that reality.

## Clarification

Readers of this book need to understand that what I share with them in the following discourses is not an academic exercise. The issue of homosexuality is a close-by reality. Then the influence of radical liberalism is one that affects me personally. As an author I am not allowed to write about the truth, as freedom of speech, or of a different kind of expression such as writing, does not exist anymore in Canada, and neither in the US according to a colleague of mine. I needed a special defamation lawyer going through my manuscript before my original publisher would accept my manuscript for publication. That experience has been an unexpected, painful personal experience. Not only that, it also shows the real identity of what one may call the destructive nature and manipulative power of radical Liberalism (Left).<sup>1</sup>
