Questions and answers, clarifications..... 93 to 97
Mammon speaks99

Money is today regulated by the same laws that controlled it when, six thousand years ago, prosperous men thronged the streets of Babylon.

Unquestionably, this is the most honest and authentic book you'll encounter concerning Mammon.

Because:

I am honest. Unlike the self-proclaimed wizards who sell e-books of only 5 pages with "Mammon's pact" for \$300. On the internet, you'll typically come across just two or three brief books on Mammon, and on Etsy, there are "pacts with Mammon" priced at over \$4000.

Numerous individuals venerate Mammon in accordance with biblical mythology or Goetian grimoires, portraying him as a corpulent, unsightly, horned demon of avarice and opulence. They invoke him with that image (egregore) in mind and call him a demon, inadvertently causing offense.

I worship Mammon as a deity (not a demon) and with due respect.

I use the right sigil. I do not use inverted pentagrams with the infinity symbol (8) placed horizontally or any other recently devised sigils.

Be aware that there are many opportunists and charlatans on the internet.

I've come across individuals on many book stores selling e-books containing just five pages, purportedly containing the "Mammon pact," and priced at \$300.

The majority of self-proclaimed wizards peddle e-books featuring entirely fabricated invocations and sigils, often offering just five pages filled with spurious prayers. Regrettably, there are unsuspecting individuals who spend hundreds of dollars on such deception. On the internet, opportunists attempt to market the "Mammon pact" for exorbitant prices. As a valued reader, this e-book, which is priced at around \$9, grants you access to the authentic pact.

I have no affinity with the idea of deceiving someone, and those who practice deception, selling pacts for exorbitant values, are undoubtedly immersed in greed, a quality often negatively associated with the concept of "Mammon".

Dealing with money in a stingy way is a negative thing. Conversely, managing it wisely and with a spiritual perspective, leading to positive transformations in your life and the lives of others, is positive.

Maintain healthy judgment when evaluating information and resources. This will help you distinguish between genuine and opportunistic content.

I can assure you that on biggest webstores there are only two or three books about Mammon. One of them addresses the "evil financial system" and associates money negatively with the concept of Mammon. The other two are basic spell guides, each comprising around 30 to 40 pages.

I will explain to you why these books are not effective: random spells simply don't work to attract money.

Mammon won't assist those who lead a lethargic, unproductive life, lack ambition in pursuing their dreams, or fail to establish clear financial goals.

Because Mammon will think "this lazy person wants me to do all the hard work for him?". "He doesn't even try a little, he doesn't educate himself about money and entrepreneurship, he doesn't have clear goals"?

Procrastinating is postponing your growth.

I've come across certain spells on the internet that incorporate rose petals and various other flowers. However, these spells are unrelated to Mammon, they are spells from Pombagira (Quimbanda system) and have been altered. This is not functional.

In this e-book, you will find powerful and functional rituals.

I have no intention of deceiving anyone by pricing my e-book at three hundred dollars for just a few pages. I offer it at a reasonable and fair

price. Moreover, I acknowledge the existence of unscrupulous authors who might attempt to plagiarize this content and resell it at exorbitant prices. Nevertheless, I have officially registered the rights to this work, and, if required, I will pursue legal measures to safeguard my copyright.

I believe authenticity is rooted in research, respect, and a sincere pursuit of personal growth.

Dear reader, I do not want this to be just “another book about Mammon”. In this book I intend to go beyond the conventional, I want to convey some concepts of entrepreneurship and how to deal with the energy of money. If the reader performs these spells but remains idly and passive, waiting, it's unlikely that Mammon will offer assistance.

Imagine magick not as a shortcut to success, but as an additional force that drives your actions.

You have to be proactive, and use magick only as an “extra support force”. Magick will attract help from the spiritual plane to remove some obstacles from your path, for example, give you insights (inspiration), attract the right people to your path. Be aware of synchronicities.

I'd like to share a bit about myself.

I started my book writing journey with a meticulous approach, conducting an in-depth analysis of the market and my target audience. Some crucial questions arose in my mind: “Do I want to do more of the same, or something different?”, “What's missing in the market that doesn't already exist?”. “How can I make my books different and with quality?” I don't use PLR e-books, as in this specific niche there are no such resources available (there are only niches with Marketing, Yoga, self-help, Reiki), I also don't use ghostwriters. I write my content, I spend months researching and writing. Knowledge, passion, and commitment are interconnected.

I dedicate numerous hours to reading, writing and researching entrepreneurship, in fact, I completed two courses in this field.

My entrepreneurial journey was also marked by ups and downs. While certain online ventures didn't thrive, prompting me to relinquish them, others are currently flourishing. I firmly believe that an essential aspect of the road to success is mastering the art of persistence, even in the face of adversity, and discerning when it's necessary to move on from something. Falling and getting up are part of this trajectory, and that is how success is achieved.

My book is different because it offers more than just spells; guides the reader on the importance of a change of mindset to achieve success. I emphasize the need for self-education to learn how to attract money. Only after this preparation can spells be performed with deep conviction and faith. It is crucial to understand and apply the law of attraction and maintain a positive vibration that is consistent with your goals.

Don't rush the results, be patient.

My first payment on self publishing was 50 dollars, I reinvested that money in marketing, promoting the e-books. Then I started earning 200 dollars a month, I continued to reinvest that money in marketing. I believe that success often requires reinvestment and ongoing actions to expand our presence and reach.

I enrolled in a four-month, in-person course on online marketing and entrepreneurship right here in my city. During this period, I honed my skills and capabilities. Additionally, I've dedicated myself to the study and practice of occultism for the past twenty-six years. It underscores the importance of nurturing an entrepreneurial spirit, constantly seeking to acquire new knowledge (never ceasing to learn), and pursuing our dreams with unwavering determination. We are beings on a journey of self-actualization.

Now I earn two thousand dollars a month from my books royalties, I continue to write books and translate them into multiple languages, to reach readers in more countries, etc. I study new online marketing techniques, improve the keywords and listings for my books, etc.

I dedicate myself, I make efforts, I sometimes spend whole nights writing, I often give up relaxing, going for a walk and resting, because I'm always writing and answering emails. Readers know that when

they send me emails, I always respond and know how to answer the questions they ask me. Money must flow, just as readers purchase my e-books, I, too, purchase e-books from other authors, thereby contributing to their income.

Entrepreneurship tips:

Discover your passion, what you are really good at. If you are in a profession where you are unhappy, think about working for yourself in what you enjoy. Initially, you can pursue this endeavor part-time, while maintaining your current job to ensure a stable source of income. Once you've established secure conditions and saved up sufficient funds, you can transition to working for yourself full-time.

On the internet there are websites where you can sell your services, be it crafts (on Etsy or eBay), translation services or content writing, voice-over recording, audiobooks, freelancing on Fiverr. You can sell e-books on many platforms worldwide. The best of all is that everything is automated and generates passive income. You can do a huge number of things, but be good and original in what you produce, this will make a difference and attract customers.

Stop being a consumer and become a producer (of content or services).

To make Money, you need to have a plan, everyone has dreams, but few have a "plan". Those who conceive ideas may not yield profits, but those who put these ideas into practical action own them and reap the benefits.

Learn how to deal with people, find out what they really want. You will not make "money appear out of thin air", the money will come to you through other people. Whether in business, selling products, or providing services, people will seek you out and pay you. Money will come to you through people. Therefore, it is important to create bonds
