Gnome Rubus

MY NAME IS....

“Hello, I am... gnome!

Just like other gnomes, we only get our name when our cheeks turn red and rosy.

That usually happens between our 10th and 20th birthday.

Then we gnomes can choose our own name. That is nice, because then we can't complain about it, like human children sometimes do.

When I was a young gnome, I appeared for the first time in the Dutch city of Haarlem, in a park called Haarlemmer Hout.

My caretakers are Gnome Mentha and Gnome Beechnut.

Caretakers are the gnomes who are there when a young gnome appears for the very first time.

Gnomes are not born like people. We appear where we are needed.”
