Crayons, colored pencils and markers are perfect for tiny hands. Choose ones that don't break easily and have bright, cheerful colors.

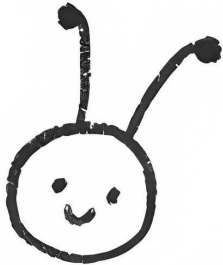

Oops! Made a little mistake? Choose a soft eraser that works well without tearing the paper. Some erasers can be too hard and might smudge or damage the drawing.

Thick, smooth paper gives you a great space to draw, color, and imagine freely. A sketchbook helps you keep all your masterpieces in one place!

1.

Start with easy shapes like circles, lines, or curves. Then, we can add small details such as eyes or a smile.

Use a pencil to trace the new black lines in each step. The grey lines show what you've already drawn before.

2.

With each new step, you'll add more fun details. Take your time and enjoy the process!

3.

You can always add your own ideas.
Drawing is all about having fun and being creative!

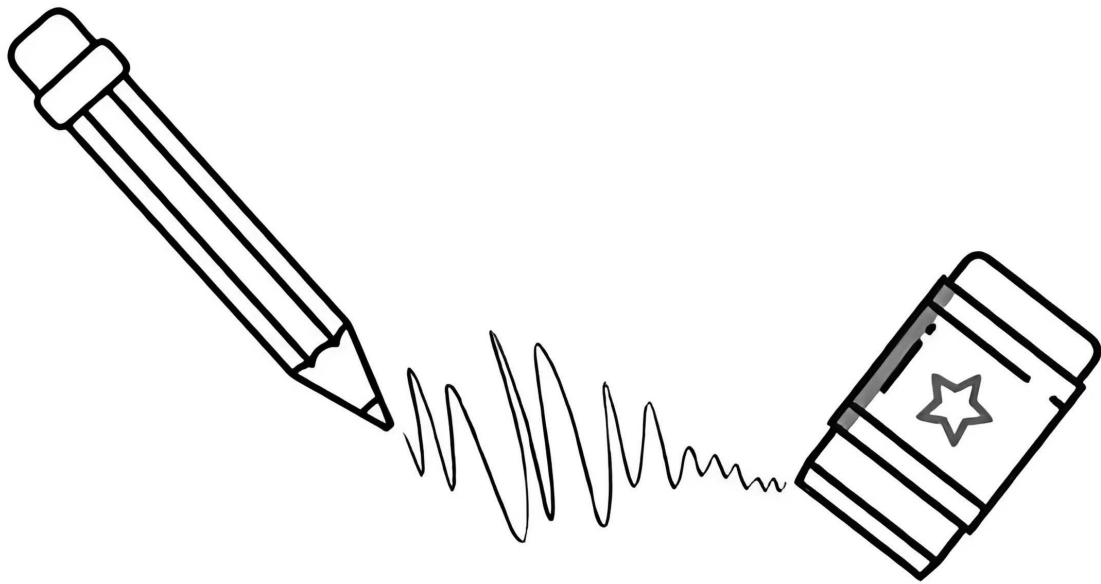

Welcome to the world of K-pop characters —where music, creativity, and imagination come together. This drawing book is designed especially for kids who love cute characters, fun fashion, and energetic performances inspired by K-pop style. Inside these pages, you will learn how to draw adorable chibi characters step by step. Each character has big expressions, simple shapes, and playful details that make drawing easy and enjoyable, even for beginners. You do not need to be a professional artist—just grab a pencil, follow the steps, and have fun.

This book helps children improve hand-eye coordination, build confidence in drawing, and express their creativity freely. There are no rules here. You can change hairstyles, outfits, poses, or add your own ideas to make every character unique.

Take your time, enjoy the process, and remember: the best drawings are the ones you enjoy making. Let's start drawing and bring your chibi K-pop characters to life.
