Table of Contents

.....	1
Introduction	3
What is Lean Healthcare?	5
Areas of Improvements in Healthcare Centers & Hospitals and How to Tackle Wastes.....	7
The Eight Types of Waste Provide Opportunities for Improvement	9
Standardization as the Foundation of Healthcare Quality	14
Writing Standard Guidelines for Healthcare Centers	16
Standards Guard Against Calamity.....	17
Adding Value to Patients with Standardization	20
Lean Can Bring Positive Change to Healthcare	21
Lean Leadership in Healthcare and Research Work in this Area.....	23
Appendix I.	40
The Seven Manufacturing Deadly Wastes.....	41
Transportation	42
Inventory	43
Motion.....	44
Waiting.....	45
Overproduction.....	46
Overprocessing.....	48
Defect.....	49
Untapped Human Potential.....	50
APPENDIX II: What is 5S?	51
Appendix III: What Toyota's Production System Is Really About.....	53
References	62

About the Author.....75

Dedication

Dedication I created this book with the help of more than fifteen different business resources. These academic articles and books are all cited at the end of this book. A number of people have influenced my learning journey and my entire career. I would like to acknowledge them here.

Esraa Soliman: My lovely wife and partner. She encouraged me to write and publish this work. In fact, she always encourages me to do creative work.

Jeffrey Liker: Professor at the University of Michigan and author of *The Toyota Way* and the amazing Toyota series of books. His impressive work on Toyota inspired and influenced my learning about the Toyota Production System. I would really like to thank him for his indirect involvement in this work. Many examples included in this book were originally from his books. Although I have never met Jeff face to face, we have had great communications over social media platforms.

Chris Duklet: A lean manufacturing leader from the United States who works in the field of health care. He has contributed to this work by reviewing the book prior to publication and giving me useful recommendations and advice.

Attia Gomaa: Professor at the American University in Cairo who influenced my teaching career at the university and taught me how to become a good trainer.

Steven Borris: A business consultant, author, and friend from England who influenced my writing career. He encouraged me to write and publish. Steven was my mentor on lean manufacturing, helping me first to understand the basics, after which I developed my understanding through deep practice and self-directed learning.

Eslam Soliman: My friend and a professor at the Assiut University. His PhD is from the University of New Mexico. He has influenced my entire writing career by giving me recommendations and advice on how to write and publish. He revised my published works many times and kept inspiring me after every piece I wrote and published.
