FAIR-PLAY PROMISE

Every clue is literal, independently true of the killer, and based only on information printed in this book. No outside knowledge, guessing, hidden story facts, or trick wording is required. Apply the clues exactly as written and one suspect remains.

PUZZLE INTEGRITY

This edition has been checked against all 21,000 suspect entries. The clue sequence resolves uniquely to the published solution. The suspect register is preserved in its original order because neighboring-name and page-position clues depend on that sequence.

This is a work of fiction. Names in the suspect register are used fictitiously; resemblance to real persons is coincidental. First edition, 2026.

The Case

Twenty-one thousand names have entered the investigation. One of them belongs to the killer. Nothing about the answer is hidden outside the register: the evidence is encoded in spelling, letter patterns, name length, register position, and the suspects printed immediately before and after the killer. Your job is to narrow the field until only one name survives.

How to Play

1. Start with the full suspect register. Each printed occurrence of a name is one suspect, even when the same spelling appears more than once.
2. Read Clue 1 and eliminate every suspect who does not satisfy it. Then apply Clue 2 only to the suspects still in play.
3. Continue in order. Some clues describe the killer's name; others depend on the killer's location in the register or the names directly beside it.
4. When a clue refers to the name immediately before or after a suspect, use the continuous register order: left to right across each line, then down the page, continuing across page breaks.
5. After Clue 20, exactly one suspect should remain. Do not turn to the solution section until you are ready to close the case.

Rules & Investigator Checkpoints

CORE RULES

- Vowels are A, E, I, O, and U only. Y is not treated as a vowel.
- Letters are matched without regard to capitalization.
- If a name appears more than once, every printed occurrence is a separate suspect.
- When a clue refers to a register page, count the page labels inside the suspect register, not the book's overall PDF page number.
- Alphabet values use A=1, B=2, ... Z=26.
- For repeated-letter clues, count distinct letters that occur more than once, not the total number of repeated positions.

WORKED EXAMPLE

If a clue says the killer does NOT contain E, eliminate every suspect whose printed name contains E. If the register contains two suspects named Mary, both remain because MARY has no E. A location clue can later distinguish between those two occurrences.

VERIFIED CHECKPOINTS

After Clue 5	2,343 suspects remain
After Clue 10	161 suspects remain
After Clue 15	17 suspects remain
After Clue 18	3 suspects remain
After Clue 19	2 suspects remain
After Clue 20	1 suspect remains

The 20 Clues

- 1.** The killer's initial is NOT one of the four most common starting letters in the register: A, M, K, or J.
- 2.** The name immediately after the killer begins with a consonant.
- 3.** The killer's name uses at least one letter more than once.
- 4.** The killer's name ends with a vowel.
- 5.** The killer's name contains the letter E.
- 6.** The name immediately before the killer is shorter than the killer's name.
- 7.** The killer's name has an odd number of vowels.
- 8.** Exactly one different letter appears more than once in the killer's name.
- 9.** The killer's name does NOT contain the letter L.
- 10.** Somewhere in the killer's name, the same vowel appears at least twice.
- 11.** The killer's name has an odd number of letters.
- 12.** The killer's first letter comes after its last letter in the alphabet.
- 13.** The first and last letters of the killer's name add up to at least 20 (A=1 through Z=26).
- 14.** The killer is NOT within the final 16 pages of the 97-page suspect register.
- 15.** The killer's name contains the letter R.
- 16.** The last two letters of the killer's name add up to at least 19 (A=1 through Z=26).
- 17.** The gap between the earliest and latest letters in the killer's name is less than 18 alphabet positions.
- 18.** The killer's name length is NOT one of the two most common lengths in the entire register: 6 or 7 letters.
- 19.** The killer's name is fewer than 6 letters long.
- 20.** The name immediately after the killer is longer than the killer's name.

THE SUSPECT REGISTER

21,000 names. One surviving suspect.

Read left to right, line by line, and continue across page breaks.
