[VIDEO TEXT]

How do the various international developments and trends in our world come about? Are they purely random, organic developments, or is there calculus, strategy and a certain degree of planning behind them? In many broadcasts Kla.TV has already highlighted the wealthy and influential power brokers who advocate for eugenics and population reduction and are actively working on population control. The new and growing Freemason world map recently published on Vetopedia.org reveals the details about how many of the institutions that dominate our world have ties to secret societies. True to the motto: “It’s a big club,

but you ain't in it." In this broadcast, we present another piece to the puzzle providing indications that a plan for international population control and population reduction exists. This is the testimony of the American physician Dr. Lawrence Dunegan from 1988. Dr. Lawrence Dunegan (1933–2004) was a pediatrician who practiced his entire career in Pittsburgh, Pennsylvania. One of his professors at the University of Pittsburgh was a man named Dr. Richard Day (1905–1989). On March 20, 1969, he was present at a meeting at the Lamont Restaurant of the Pittsburgh Pediatric Society. Dr. Richard Day was the speaker for the evening and spoke for more than two hours to the approximately 80 physicians in attendance. During his talk, he outlined elitist plans for the future, which he wanted to share with the audience so they could better prepare for what was to come. Before he began, he asked his audience to turn off all recording devices and not to take any notes. The fact that the contents of the speech nevertheless are known is thanks to Dr. Lawrence Dunegan, who was in the audience that evening. By his own account, he made an effort to memorize as much as possible of what was said and to document it in the years that followed. In 1988, he recorded on tape his memories of the speech and his observations regarding the predictions of Dr. Richard Day that already were unfolding. In 1991, he also gave an interview on the subject, which is available as a recording. What is particularly noteworthy about Dr. Richard Day, the prominent guest speaker on that March evening in 1969 in Pittsburgh? In addition to

his decades of work at Columbia University in New York—whose medical school was reformed and expanded by the Rockefellers—he served as medical director for Planned Parenthood USA until shortly before his 1969 speech. Planned Parenthood was established by eugenicist Margaret Sanger with financial support from eugenicist John D. Rockefeller Jr. According to "The Journal of Pediatrics," Dr. Richard Day accepted the position because of his, I quote: "strong conviction that the issue of overpopulation was arguably the most important problem faced by this planet." Certain statements in his speech, that revealed insider knowledge about Rockefeller University and his work with institutions that were affiliated with the Rockefellers, fuel the suspicion that he had some exclusive insider information within elite circles. While some of Dr. Richard Day's predictions have not yet come to pass, an astonishing number of detailed predictions have already become reality or are currently being implemented. This gives so much significance to the report Dr. Lawrence Dunegan from 1988. British author and commentator David Icke addressed Day's 1969 prophecies in his "Dot-Connector" videocast from April 2022 where he connects them to current international developments. As this speech is gaining relevance with every passing day, Kla.TV has translated it to multiple languages and is presenting it next - also in English. Since David Icke doesn‘t adress all of Dr. Richard Day's statements, we recommend you to also watch the entire tapes by Dr. Laurence

Dunegan for your self-study and we‘ll put all Links below the video for you to find.

[David Icke:]

Hello and welcome to the David Icke Dot Connector video cast. Well, I know there are some people that think the COVID hoax is sort of over and that the battle has been won but it hasn't. We are right in the middle of a fantastic agenda to enslave the entirety of humanity. And what I'm going to do today is to give you an example of how long this has been planned and therefore it's not going away unless we make it so. So you may have seen of course a lot of the COVID restrictions roll back, but that doesn't mean they can't return. Have a look at what's happening in China now and also this is much bigger than COVID. That has been a massive operation hoax to advance this agenda very very quickly in the last two years or so, but it's only part of it, it's not actually it. It is far bigger than that so like I say today, I'm going to give you an example of how long this has been planned and not only how long, but to the fine detail involved. So, I'm going to look at what a man called Richard Day, Dr Richard Day, said in 1969. That's 20 years after Orwell's 1984 and nearly 40 years after Aldous Huxley's Brave New World. Now they are officially novels, but as I've said over the years, they weren't coming anything like entirely from their imagination. There was a lot of knowledge in there about what was

actually coming, and in terms of Richard Day in 1969 it wasn't a novel at all. This guy was a big big Rockefeller insider, he was a professor of pediatrics at Mount Sinai Hospital in New York, and he was an executive of Planned Parenthood, a Rockefeller operation that began life as it would with the Rockefeller family in the eugenics movement. And we've had Bill Gates say in interviews that his father ran Planned Parenthood at one time. This is the Gates family that is extremely close to the Rockefellers. Bill Gates is a Rockefeller gopher, the same Rockefeller family that created the World Health Organization and now has Bill Gates run it for him to the end, that we have not only clearly seen in the last two years. But with this planned treaty between the World Health Organization and member countries, the next stage is that the World Health Organization becomes a full-blown global health dictatorship - lack of health: dictatorship where what it says, goes in all those countries. So, no one knows why Dr Richard Day said what he did in the situation, but I for one am extremely grateful to him for what he did because he revealed so much about what is happening now. Richard Day being a professor of pediatrics, stood up at a gathering of pediatricians in Pittsburgh Pennsylvania in 1969. He asked the audience not to take notes and to turn off recording equipment because he was going to reveal, and it turned out in detail how the world was going to change, because basically that which he represented was going to change it, and this is what I refer to as the global cult, the global network of secret societies

with an interlocking American leadership, a spider at the center that's driving this Orwellian fascist communist technocratic agenda for the world. And I reveal at length in a book called Phantom Self what Richard Day said that night, because one pediatrician at Dunegan did take notes and before he died in 2004, he did a series of interviews revealing what Day had said in 1969. And he did it because he could by then see that what Day said was going to happen was happening. And today, as you're going to see, you're going to see, spectacularly more. So, one of the things he said in 1969 is that we can cure almost every cancer right now. And that the information to do that was on file at the Rockefeller Institute - now called the Rockefeller University. He said that they're not revealing this cure for cancer because people have to die of something, so they might as well die of that and it's necessary to keep the population down anyway, he said. So, this Rockefeller Institute is very interesting and very significant because the whole modern theory of a virus basically comes out of the same Rockefeller Institute, the institute that was created by the infamous J.D. Rockefeller in 1901 the same J.D. Rockefeller who was the instigator and creator of the big pharma cartell that's now producing all these fake vaccines that are creating death and health mayhem all over the world. And the director of the Rockefeller Institute between 1937 and 1956 was a man called Thomas Milton Rivers who just happens to be known as the father of modern virology. So, let's put this together: you have the father of modern virology working for

the Rockefellers the Rockefeller family that created the big pharma cartel and the the cartel that has exploited the alleged story theory of viruses to make enormous amounts of money and gather enormous amounts of control the Covid era I rest my bloody case. And all that is a coincidenc, right. No chance. And Dr. Richard Day was a Rockefeller insider who in 1969 revealed to those pediatricians in Pittsburgh Pennsylvania what was going to happen to the world and it has and is happening. The same Rockefeller family that created the World Health Organization in 1948 as part of the United Nations which they also were fundamental in creating indeed the land on which the United Nations building stands in New York was given free by the Rockefeller family. And the World Health Organization just happens to have been the central point of driving the response to quote Covid. So, this is some of what Dr. Richard Day told those pediatricians all those decades ago in 1969 as reported by Dr. Lawrence Dunegan. Now how about this first one in the light of very current events. “We”, he said, “the cult are going to make boys and girls the same”, 1969. He said it was part of the plan that people would be made gender-neutral, boys and girls would be the same and reproduction without sex would be performed in laboratories. This is what Aldous Huxley described in Brave New World: Parentless production of the species without procreation and this is what I've been talking about all these years in terms of the creation which these fake synthetic genetic things allege, vaccines are all involved in transforming the

human body from human 1. 0 to human 2. 0 which would be a non procreating human. And he went on to talk about politics. He said that very few people really know how government works, you know, kidding. He said something to the effect that elected officials are influenced in ways they don't even realize and they carry out plans that have been made for them that they think they are the authors of when they are not. Something else I've been going on about for so long, these people have no idea that this cult exists. Most of them don't anyway the insiders do of course. And therefore, they don't really know where all this policy and direction of the world is coming from. But they are kidded into believing that somehow, it's coming from within their circle when it's not, but actually Day said they are manipulated in ways they don't understand. He went on to say that most people don't understand how governments operate and even people in high positions in government including the United States government don't really understand how and where decisions are made, exactly. One of the statements, Dunagan reports, was having to do with change. The statement was, people will have to get used to the idea of change, so used to change, they'll be expecting change, nothing will be permanent. Look around, sounds familiar? This often came out in the context - Dunagan says - of a society where people seem to have no roots or moorings but would be passively willing to accept change, simply because it was sold to them with an ostensible purpose which will make it acceptable to them when there was really

a second real purpose which would further the goals of establishing this new order what is now called this Great Reset, this new system, as Day called it. He said people are too trusting, people don't ask the right questions. So, this is something else I've talked about over the years. Going way back how there is a real reason why something happens and then there's the cover reason that people are supposed to believe it's why it's happening and so for instance and these two things are almost every time complete inversions of each other. So, if you look at what they call Covid, then all that's happened was supposed to be to protect the health of the population, when actually it was to destroy the health of the population and totally transform global society. That's the reason you want to believe, that's for your health we are nice, we are… the real reason… Ah.. Well, actually we're not nice.

Ukraine, it's supposed to be a war where everything relates to Russia. That's the reason that we are given for. When actually what it's really about is targeting the global economy especially in the west as part of crashing the global economy so that they can bring in this new system that Day talked about, what I call creative destruction. If you want to bring in something new you've got to destroy what went before. So, Day then talked 1969 about a global economic dictatorship. The stated plan, reported by Dunegan, was that different parts of the world will be assigned different roles of industry and commerce in a unified global system. The continued preeminence of the United States just waits for this one, 1969. The continued
