Coincidences ???
They don't exist !!!
Everything orchestrated by the Universe
in collaboration with you

Marita G. Schmitz

Coincidences ???

They don't exist !!!

Everything orchestrated by the ☝ Universe

in collaboration with you

Sure, …
… at first you don't know anything about it …
… you don't even suspect it …

...but at some point you wake up...
...at some point you become aware...
...at some point you get a gut feeling...

“Your intuition”

"Enlightenment"

Yes,...

… all no coincidence!!!

If you've come across my book, then the universe wishes you to read it - because there are no coincidences!

I.

Rejection,

because I wasn't born the way my family of origin wanted me to be.

Straightening out my being

II.

The responsibility

for my two-year-older sister was transferred to me by my parents (mother), even though I was still a child myself.

III.

The black sheep of the family

IV.

My encounter with special numbers, such as double or angel numbers, power animals and other signs

What did they want to tell me?

Sympathy and lucky numbers

House numbers

Power animals

Feathers

V.

How the universe ensures that you have everything and can do everything to live your calling, your life plan

Experiences

Predominantly temporary employment contracts
brought grief back then - now flexibility.

Encounters with foreigners
or with children of foreign origins

Coincidences???

They don't exist!!!

Everything staged by the ☝ Universe

in collaboration with you

(and you yourself are a part of it, and not an insignificant part!)

You just forgot it at birth...

…all no coincidence!

Imagine for a moment that everything you have experienced in your life so far, everything that has happened to you, that none of this is a coincidence.

Yes, because coincidences - there are no such things!!!

Everything was already planned when you were born.

You have already brought your learning tasks with you and have helped decide in or with which family of origin you can solve them.

That's exactly why you were born into this family.

Sure...

… first of all, you don’t know anything about it…

… you don’t even suspect it …

...but at some point you wake up...

…at some point you will realize it…

… at some point a gut feeling …
