Contents

1. Preface – crossing the threshold	11
1.1 Ethiopia, my second home	11
1.2 Why another book about system transitions?	14
1.3 What can you (not) expect in this book?	17
1.4 Semantics	18
1.5 Ecosystem, landscapes, value chains, food and financial systems	18
2. The key connection	21
2.1 Relationships in a complex system	21
2.2 The key connection – seven insights toward a well-balanced system	24
2.2.1 The way to the center	24
2.2.2 The key connection as the way to the center	25
2.2.3 Insight 1: Slowing down to accelerate (chapter 3)	26
2.2.4 Insight 2: Understanding the roots and the top to define the signature of a system (chapter 4)	28
2.2.5 Insight 3: Understanding the past is crucial for shaping the future (chapter 5)	30
2.2.6 Insight 4: I am because we are, looking at the whole system (chapter 6)	31
2.2.7 Insight 5: Zooming in and zooming out in a nested system (chapter 7)	32
2.2.8 Insight 6: A sustainable balance requires a lot of energy (chapter 8)	33
2.2.9 Insight 7: Clustering Dynamic Layers: The key connection (chapter 9)	34
3. Insight 1:	
Slowing down to accelerate	37
3.1 Being all over the place in the world	37
3.1.1 Crossing the threshold	37
3.1.2 Where you stumble, there lies your treasure	39
3.1.3 Slowing down to accelerate	42
3.1.4 Why pulling grass does not work	44
3.1.5 Everybody has their own learning pathway	46
3.1.6 Following your own rhythm	47

3.2	Key lessons learned: Slowing down to accelerate	48
3.3	Suggestions for practical applications	49
3.3.1	Working in the “Kairos” time	49
3.3.2	Be prepared so that you can be flexible	49
3.3.3	Focus on achieving the objectives of your partners instead of your own objectives	50
3.3.4	Postpone your own judgment	50
3.3.5	Define success	50
4.	Insight 2: Understanding the roots and the top to define the signature of a system	51
4.1	What is your unique signature?	51
4.1.1	The roots and brains of a person	53
4.1.2	A well-balanced person	54
4.2	What is the signature of an organization?	56
4.2.1	The narrative (signature) of an organization	56
4.2.2	What is the voice at the top today?	58
4.2.3	A well-balanced organization	60
4.3	Key lessons learned: Understanding the roots and the top to define the signature of a system	61
4.4	Suggestions for practical application	61
4.4.1	Use the universal principles of human dynamics	61
4.4.2	Assess the food and agribusiness strategy with the other strategic dimensions	61
4.4.3	First manage an organization’s own polarities	62
4.4.4	Assessing the voice at the top	62
5.	Insight 3: Understanding the past is crucial for shaping the future	63
5.1	We hit the wall today because of our past	63
5.2	Creating a bright future	67
5.2.1	A climate-resilient and sustainable food and agribusiness sector	67
5.2.2	A masked loser or a promising winner?	72
5.3	Convergence to a new future	75
5.3.1	Changes in spatial patterns	75
5.3.2	Changes in time patterns	78
5.3.3	Human cognition	81

5.4	Key lessons learned: Understanding the past is crucial for shaping the future	81
5.5	Suggestions for practical application	82
5.5.1	Resilience and development are both important to create a bright future	82
5.5.2	Spread seasonality	82
5.5.3	Defining a joint vision	82
5.5.4	Make a movie to anticipate on the future	83
5.5.5	Look at common denominators	83
5.5.6	Think big, start small	83
5.5.7	Look at structural growth	84
6.	Insight 4:	
	I am because we are – looking at the whole ecosystem	85
6.1	I am because we are – the parts and the whole	85
6.2	The parts and the whole, a complex adaptive system	86
6.2.1	Living systems: complex and adaptive	86
6.2.2	How do we manage complexity?	87
6.2.3	The consequences of the way we manage complexity	90
6.3	A paradigm shift in managing complex systems	96
6.3.1	Concentration and dispersion in complex systems	97
6.3.2	Developing inside-out hyperlocal ecosystems	100
6.4	Key lessons learned: I am because we are, looking at the whole ecosystem	103
6.5	Suggestions for practical application	103
6.5.1	Assessing fragmentation from a place dimension	103
6.5.2	Assessing fragmentation from a time dimension	103
6.5.3	Healthy soils, the feet of a system	104
6.5.4	Tools of a system thinker	104
6.5.5	Blending traditional and scientific knowledge	105
6.5.6	Hyper digital solutions – reducing complexity	105
6.5.7	Bundling activities	106
6.5.8	Knowledge as information becomes knowledge as communication	106
6.5.9	Increasing the pie instead of increasing your own part of the pie	106
6.5.10	Manage activities through a regional lens instead of a sector lens	106

6.5.11	Creating small concentrations	107
6.5.12	Think win-win	107
7.	Insight 5:	
	Zooming in and zooming out in a nested system	109
7.1	We all live in a nested system – time and space to flourish	109
7.1.1	An adaptive cycle	109
7.1.2	Patterns in a panarchy	111
7.1.3	Waves in a panarchy	112
7.2	The impact of a nested system	113
7.2.1	The impact of a nested system on a food system	113
7.2.2	The impact of a nested system on a financial system	115
7.2.3	The impact of a nested system on enablers	115
7.3	Zooming out and zooming in at the same time	116
7.3.1	The key problem	116
7.3.2	Zooming in	118
7.3.3	Zooming out	119
7.4	Creating a well balanced nested system	122
7.4.1	Changing connections in a nested system	122
7.4.2	New systems in case there is no room to maneuver	125
7.4.3	Energy – the lever to change connections	126
7.5	Key lessons learned: Zooming out and zooming in in a nested system	126
7.6	Suggestions for practical application	127
7.6.1	Assess a nested system	127
7.6.2	Applying adaptive management practices	127
7.6.3	Use the growth and renewal phase to achieve growth and change	128
7.6.4	Different lenses to assess sectors	128
7.6.5	Partners who think beyond their own shadow	129
7.6.6	Improve the resilience of the system	129
7.6.7	Measuring with bandwidth	130
7.6.8	What do Ethiopia and Mongolia have in common?	131
7.6.9	Inside-out development does not exclude outside-in thinking	132
7.6.10	An innovation center within a bank	132
8.	Insight 6:	
	A sustainable balance requires a lot of energy	133
8.1	Everything is energy	133

8.1.1	Concentration of energy	133
8.1.2	The direction of energy	135
8.1.3	Energy to solve barriers	136
8.2	Changing the connection	140
8.2.1	Communication	140
8.2.2	Coordination	144
8.2.3	Capital	147
8.3	Key lessons learned: A sustainable system requires a lot of energy	151
8.4	Suggestions for practical application	152
8.4.1	Concentrate energy to rebalance small systems	152
8.4.2	Focus on internal communication to create mass internally	152
8.4.3	Use the basic principles of a dialogue	153
8.4.4	Identifying highly connected people	153
8.4.5	Made to stick	154
8.4.6	Details can make or break implementation	154
8.4.7	Data as the new collateral	155
8.4.8	Disruptive solutions	155
9.	Insight 7:	
	Clustering Dynamic Layers: the key connection	159
9.1	Key connection	159
9.2	Financial institutions as the key connector	160
9.2.1	Bankers the key connector?	160
9.2.2	The new role for bankers	161
9.3	Bankers and food system partners live in another world	164
9.3.1	Bankers and food system partners: two opposite poles	164
9.3.2	Are bankers well connected?	165
9.4	Creating the key connection through Clustering Dynamic Layers	169
9.4.1	Clustering partners	170
9.4.2	Aligning the heartbeat	170
9.4.3	Clustering layers	171
9.5	The key connection to achieve scale – think big, start small	172
9.6	Key lessons learned: Clustering Dynamic Layers: the key connection	175
9.7	Suggestions for practical application	176
9.7.1	Internal alignment before external interventions	176
9.7.2	Banking the food and agribusiness sector is an ecosystem play	176
9.7.3	Expertise centers in regions	176
9.7.4	A paradigm shift to be disruptive in the market	177

9.7.5	Assess the distance between the partners	177
9.7.6	Clustering Dynamic Layers	177
Epilogue		181
Thank you!		183
