

I am really very enthusiastic about the structure of this course. It is not a lot of pure dry theory, but a lot of valuable knowledge that you can immediately put into practice. I would like to thank you very much for this.

I have done many courses where you get lost in pure theory, but here the knowledge is conveyed very interesting and to the point.

Fikreta Vicktoria Pajic from Lucerne, Switzerland

Thank you for giving me the opportunity to study with Laser College, It has been a wonderful experience.

This course is very informative, it explains every step of it in detail, it helps us building the confidence when you have to speak to any client. It was more than my expectations; I did not expect to learn so much in one course, the videos that are loaded here, plays a major role. Sometimes certain things I got to understand them better when there's a visual demonstration of it. I'm happy with what I've learnt and I look forward to learn even more of this interesting course, and I wouldn't change anything, everything has been explained professionally good and in simple English.

Mantiki Paulina Mabitsela from Pretoria, South Africa

I have enjoyed this course immensely, learning something new every step of the way. The course has surpassed my expectations on so many levels. I had expected a basic course with simple information about different laser treatments and how to carry out different procedures.

However, I was pleasantly surprised to learn that the course began by quite extensively covering the fundamental science of lasers and the physics involved at an atomic level.

It refreshed my rusty high school knowledge on light and its properties.

This course is so much more than just technical information. It pushed me out of my comfort zone, every assignment led me to discover and familiarise myself with the local laser services available around me.

The price for this course is very fair, you get more than your money's worth. The course itself is evolving and kept updated, something I noticed as someone who took over 3 years to complete it, there were parts added on later and updated which I appreciated.

Overall 10/10 would definitely recommend this course to anyone who wants to get started with lasers.

Faaiza Suleman from Harare, Zimbabwe
