

# OKSANA OOMS

**OKSANA OOMS**

**IMPORTANT WORDS  
OF MOTHER TO SON**

**2022**

# DAY ONE

Every mother dreams of a son.  
She carries him in her dreams, and heart from  
adolescence, so real, so dear.  
There are even such moms who happen to have a son in real life.  
They are the happiest moms, because their desire  
to prolong their line, to raise a real man,  
and to hold him tight has come true.  
If not, a son comes to mother in her dreams,  
so she sings him a lullaby and holds him in her arms.  
Anyway, she is a mother.  
Because she has a son whom she loves.  
We are all mothers of our beloved and long-awaited sons.  
Be happy, our dear, precious children wherever you are.  
Moms love you forever.

# DAY TWO

Do you know how to become popular? It's as easy as pie.

Possess a lot of knowledge and an easy-going character.

Then you'll be constantly in the spotlight.

An energetic man, driven by his ideas gathers crowds of people.

He has a sea of energy because of his brain work.

The laughing man attracts like a magnet.

He's always everywhere.

Usually, crowds follow such people, even trying to keep quiet,

so as not to frighten clever ideas and hear everything.

They will even look in: how he comes up with those ideas.

Just looked - and here you have a ready way out from the strange situation.

We must learn from such legends!

The smartie surprises and motivates with the bombardment of those ideas.

He attracts so that children learn from him on the

fly, on the rise, and the glimpse.

A good mood with a light and cheerful character is an excellent incendiary mix to  
make the stars flare up.

We can even say that the smart one produces many of his clones in people  
through his presence and easy presentation of those inventions, who will also  
bombard these Worlds with great ideas after living for a while.

After all, education occurs only by example, by igniting the bright spark that  
burns in your heart, and all the hearts around you.

And definitely not with the cold sheets of abstruse books and fascinatingly  
flashing computer programs.
